Electrical Installation Condition Report

Requirements for Electrical Installations - BS 7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

Guidance for recipients:

This report is an important and valuable document which should be retained for future reference.

1. The purpose of this Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The Report should identify any damage, deterioration, defects and/or conditions which may limitations of this inspection, be fully identified. Such give rise to danger (see Section K).

2. This Report is only valid if accompanied by the Inspection Schedule(s) and the Schedule(s) of Circuit Details and Test Results.

3. The person ordering the Report should have received the original Report and the inspector should have retained a duplicate.

4. The original Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner / occupier with details of the condition of the electrical installation at the time the Report was issued.

5. Section D (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.

6. Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.

7. For items classified in Section K as C1 ("Danger Present"), the safety of those using the installation is at confirm it is in operational condition in accordance with risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.

8. For items classified in Section K as C2 ("Potentially Dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

9. Where it has been stated in Section K that an observation requires further investigation code FI the inspection has revealed an apparent deficiency which may result in a code C1 or C2 could not, due to the extent or observations should be investigated as soon as possible. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).

10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons competent in such work. The recommended date by which the next inspection is due is stated in Section F of the Report under 'Recommendations' and on a label at or near to the consumer unit /distribution board (where required).

11. Where the installation includes a residual current device (RCD) it should be tested six-monthly by pressing the button marked 'T' or 'Test'. The device should switch off the supply and should then be switched on to restore the supply. If the device does not switch off the supply when the button is pressed, seek expert advice. For safety reasons it is important that this instruction is followed.

12. Where the installation includes an arc fault detection device (AFDD) having a manual test facility it should be tested six-monthly by pressing the test button. Where an AFDD has both a test button and automatic test function, manufacturer's instructions shall be followed with respect to test button operation.

13. Where the installation includes a surge protective device (SPD) the status indicator should be checked to manufacturer's information. If the indication shows that the device is not operational, seek expert advice. For safety reasons it is important that this instruction is followed.

14. Where the installation includes alternative or additional sources of supply, warning notices should be found at the origin or meter position or, if remote from the origin, at the consumer unit or distribution board and at all points of isolation of all sources of supply.

ELECTRICAL INSTALLATION CONDITION REPORT - Schedule of Inspections

for Domestic and Similar Premises up to 100 A

Requirements for Electrical Installations

BS7671:2018+A2:2022 (IET Wiring Regulations 18th Edition)

| 5.4 | 1 | Non-sheathed cables protected by enclosure in conduit, ducting or trunking (521.10.1). To include in the integrity of conduit and trunking systems (metallic and plastic) | | | | | | | | | | |
|--|--|--|--|---|--|--|--|--|--|--|--|--|
| 5.5 | | by of cables for current-carrying capacity with regard for the type and nature of installation (Section 523) | Pa | SS | | | | | | | | |
| 5.0 FIN | IAL CIRCUITS | | | | | | | | | | | |
| 5.6 | | tion between conductors and overload protective devices (433.1; 533.2.1) | Pa | SS | | | | | | | | |
| 5.7 | | y of protective devices: type and rated current for fault protection (411.3) | Pa | SS | | | | | | | | |
| 5.8 | 3 Presence | e and adequacy of circuit protective conductors (411.3.1: Section 543) | Pa | SS | | | | | | | | |
| 5.9 | 9 Wiring sy | /stem(s) appropriate for the type and nature of the installation and external influences (Section 522) | Pa | SS | | | | | | | | |
| 5.1 | | ed cables installed in prescribed zones (see Section D. Extent and limitations) (522.6.202) | N | V | | | | | | | | |
| | Cables co | oncealed under floors, above ceilings or in walls/partitions, adequately protected against damage (see Secti | | | | | | | | | | |
| 5.1 | | nd limitations) (522.6.204) | | | | | | | | | | |
| 5.12 PF | ROVISION OF A | ADDITIONAL REQUIREMENTS FOR RCD NOT EXCEEDING 30 mA: | | | | | | | | | | |
| 5.12 | 2.1 For all so | ocket-outlets of rating 32 A or less, unless an exception is permitted (411.3.3) | Pa | SS | | | | | | | | |
| 5.12 | 2.2 For the su | upply of mobile equipment not exceeding 32 A rating for use outdoors (411.3.3) | N/. | Ά | | | | | | | | |
| 5.12 | 2.3 For cable | es concealed in walls at a depth of less than 50 mm (522.6.202; 522.6.203) | N | V | | | | | | | | |
| 5.12 | 2.4 For cable | es concealed in walls/partitions containing metal parts regardless of depth (522.6.203) | N/. | 'A | | | | | | | | |
| 5.12 | 2.5 Final circu | cuits supplying luminaires within domestic (household) premises (411.3.4) | Pa | SS | | | | | | | | |
| 5.12 | 2.6 For lightin | ng that is accessible to the public (714.411.3.4) | N/. | Ά | | | | | | | | |
| 5.1 | 3 Provision | n of fire barriers, sealing arrangements and protection against thermal effects (Section 527) | Pa | SS | | | | | | | | |
| 5.1 | 4 Band II ca | ables segregated/separated from Band I cables (528.1) | Pa | SS | | | | | | | | |
| 5.1 | 5 Cables se | egregated/separated from communications cabling (528.2) | Pa | SS | | | | | | | | |
| 5.1 | 6 Cables se | egregated/separated from non-electrical services (528.3) | Pa | SS | | | | | | | | |
| 5.17 TE | ERMINATION O | RMINATION OF CABLES AT ENCLOSURES - INDICATE EXTENT OF SAMPLING IN SECTION D OF THE REPORT (SECTION 52 | | | | | | | | | | |
| 5.17 | 7.1 Connectio | ions soundly made and under no undue strain (526.6) | Pa | SS | | | | | | | | |
| 5.17 | 7.2 No basic | No basic insulation of a conductor visible outside enclosure (526.8) | | | | | | | | | | |
| 5.17 | 7.3 Connectio | Connections of live conductors adequately enclosed (526.5) | | | | | | | | | | |
| 5.17 | 7.4 Adequate | tely connected at point of entry to enclosure (glands, bushes etc.) (522.8.5) | Pa | SS | | | | | | | | |
| 5.1 | 8 Condition | Condition of accessories including socket-outlets, switches and joint boxes (651.2 (v)) | | | | | | | | | | |
| 5.1 | 9 Suitability | Suitability of accessories for external influences (512.2) | | | | | | | | | | |
| 5.2 | 0 Adequacy | Adequacy of working space/accessibility to equipment (132.12; 513.1) | | | | | | | | | | |
| | | | | | | | | | | | | |
| 5.2 | 1 Single-po | ble switching or protective devices in line conductors only (132.14; 530.3.3) | Pa | ss ss | | | | | | | | |
