# You have a gas appliance that isn't safe

Hello Mr Blackwell

During your recent Gas Safety Check at 142 Lawrence Street, York, YO10 3EB our engineer found that an appliance wasn't safe. You'll find all the details on the Gas Safety Certificate that came with this letter. Take a look to see which of your gas appliances are Safe, and which are either At Risk or Immediately Dangerous.

## What happens next

- We can make the gas appliances that failed safe again - let us know if you'd like our help. Just to let you know, we may have to charge if the gas appliance is not included in your HomeCare agreement.
- If you've already had them fixed and they are now safe, just make sure you keep a copy of any paperwork to prove your gas appliances are safe.

## We haven't checked all your gas appliances

When our engineer visited they found that there was an appliance that we weren't asked to check. You'll find it marked as NO in the 'Requested to test' section of the Gas Safety Certificate. You'll need to get this appliance checked too if:

- It belongs to you, or it was left in the property by a previous tenant, and it's connected to the gas supply\*\*
- It hasn't been installed or checked by a Gas Safe engineer in the last twelve months

\*We may record calls to help improve our service to you. Call charges to 03 numbers will cost no more than 01 or 02 numbers, please check with your phone provider.

\*\*Where an appliance has been left by a previous tenant and you haven't removed it, it's presumed you've provided it for the use of your current tenants.

**Your HomeCare number**  
911003493395

**Your agreement address**

Letter reference  
SVC/WMS/LGSC

13<sup>th</sup> August 2022

Remember, you're legally required to provide gas appliances in your rented property that are checked for gas safety - including any unchecked appliance(s) our engineer found - otherwise your Gas Safety Certificate won't be valid.

Once you or your tenant arrange for the unchecked appliance to be checked by one of our engineers, you'll be sent a new Gas Safety Certificate.

If your tenant owns the appliance, then you don't need to do anything unless you would like us to check it for you. Give us a call on **0333 202 9798\***.

If we don't hear from you, we'll be in touch again next year to remind you to book your Gas Safety Check.

Helping keep your property and tenants safe.

Thanks

Your British Gas team

# Landlord Gas Safety Record

This inspection is for gas safety purposes only in accordance with the Gas Safety (I & U) Regulations. Flues were inspected visually and checked for satisfactory evacuation of products of combustion. A detailed internal inspection of the Flue integrity, construction and lining has not been carried out.

Next safety inspection due within 12 months

This safety record has our engineer's electronic signature:

Engineer name: David Turner-Bennett 901660

Date: 10 August 2022

Job Number: 1534449479

Number of appliances tested: 1

\* If Requested to test is NO or Unable to test is YES, please take a look at the back of this certificate

It is a legal requirement that this record is kept for at least two years

## Key for Operating Value

m = Operating Pressure in Millibars (mbars)

k = Gas Rates in kilowatts (kW)

c = Combustion Ratio CO/CO<sub>2</sub> ('c' will only be displayed where neither 'm' nor 'k' could be recorded i.e. an unmetered gas supply).

Contractor's Registration Number: \_\_\_\_\_

## Your Landlord Gas Safety Record is over the page

- This is an important document
- You should take a few moments now to read it
- You may need to refer to this certificate in the future
- Please file it somewhere safe and keep for a minimum of 2 years

### Important safety information for landlords

To help you to better understand your landlord gas safety record (also known as a landlord certificate or a CP12) we would like to draw your attention to the following key sections:

#### Appliance Safe

If there is a "NO" in this section please look at the "Details of any defects we found" and "What we've done" sections overleaf. If you are unsure of any comment please contact the landlords team who will be happy to help you.

#### Indicate YES if Unable to test

If a "YES" has been entered in the column titled "Indicate YES if unable to test," then the landlord/agent must obtain additional evidence from any person undertaking subsequent work on the appliance, that the appliance is operating safely.

#### If we couldn't test appliances

You'll need to get written evidence, and must keep it with this record from anyone that checks and/or carries out any work on it to say it's working safely.

#### Requested to test

If a "NO" has been entered in the column "Requested to Test" and this relates to a gas appliance at the premise that does not belong to the current tenant

then it may be a breach of the gas safety regulation to rent the property without all gas appliances being checked. The only exception to this is if the appliance has been installed by a gas safe registered engineer and is still under the first year warranty.

**NCS** or **NTCS** Not to current standards

**AR** At Risk. This means that the appliance or installation has one or more recognised faults, and could constitute a danger to life or the property if you or anyone else continues to use it. The appliance/installation has been turned off and you shouldn't use it until work has been carried out to correct the faults identified. **It may be an offence to use a gas appliance or installation knowing it is a risk.**

**ID** Immediately Dangerous. This means that your appliance or installation presents an **immediate danger** to life if you carry on using it or if it's left connected to your gas supply. It's been turned off and should be disconnected for your safety and those around you. Using the isolated installation or equipment before it's been repaired is extremely dangerous. Please do not use it. **It is an offence to use a gas appliance or installation knowing it is dangerous.**

Here are some common abbreviations

AECV	Additional Emergency Control Valve
ASD	Atmospheric Sensing Device
ECV	Emergency Control Valve
FSD	Flame Supervision Device (also known FFD)
NGES	National Gas Emergency Service
PEB	Protective Equipotential Bonding
PRV	Pressure Relief Valve

### Key to Appliance Type Abbreviations

AGA	Aga
BBC	Back Boiler Circulator
BBF	Back Boiler Fire
CGE	Electric /Gas Cooker
CHB	Central Heating Boiler
